CLOSING TECHNOLOGIES  
[Environment Policy 2023 on 12.08.2023]

*This Management, aware that its activities and processes may generate effects that to some extent interfere with the **Environment and natural habitats**, recognizes the importance of proper conduct and control of environmental aspects, as well as of raising the awareness of its personnel to respect the environment.*

*This Management is committed to addressing environmental issues as relevant aspects of its business.*

*It is also committed to organizing the entire company structure in such a way that everyone participates according to his or her responsibilities and competencies in achieving the defined objectives.*

*Our policy is necessary to formalise the objectives and commitments that are to be achieved.*

*In particular:*

- *UNDERSTAND the internal and external context in which the company operates in order to identify the needs and expectations of its stakeholders and and seek, consistently, their satisfaction;*
- *MINIMISE the effects of its activities on the environment, seeking continuous improvement in performance, with reference to energy consumption, atmospheric emissions, waste produced, water consumption, hazardous substances used and the use of natural resources;*
- *MAXIMISE the efficient use of resources to prevent waste production and secondarily, when this is not possible, encourage the use of raw materials designed to undergo recovery processes;*
- *EXAMINE the potential environmental effects of all new or planned developments in its activities, products and services by monitoring, studying and optimising energy resource consumption, CO2 emissions, water consumption and preventing soil and air pollution;*
- *OPERATE in full compliance with current regulations and legislation on environmental matters;*
- *FOSTER the knowledge and updating of all employees about the company's organization, technical and methodological aspects, their role and responsibilities, and the environmental impacts produced by the activity;*
- *ADOPT procedures that guarantee us effective risk monitoring and the ability to intervene promptly when accidental events and emergency situations occur.*

*Luigi Strocco*
